DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, 16-57, drawn to a method of making an abrasive tool, classified in class 51, subclass 295.
- II. Claim 15, drawn to a method of abrading, classified in class 451, subclass 28.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and process of using the product. The inventions are distinct if either or both of the following can be shown: (1) that the process of making as claimed can be used to make other and materially different product or (2) the process for using the product as claimed can be practiced with another materially different product (MPEP § 806.05(f)). In the instant case the process of using can be practiced with a product not made with a slurry.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
